## **Abstract:**

The medical field is a crucial area of focus in our country. To ensure its development, special attention is given to the education system and the foreign language proficiency of medical workers. Exchange programs are also available for graduates to gain further experience. Furthermore, students who have obtained language certificates can benefit in various ways.

**Keywords:** medical staff, medical institutions of higher education, foreign languages, Ministry of Health, international certificates and scholarship.

Medicine is the science and practice of caring for patients, managing the diagnosis, prognosis, prevention, treatment, palliation of their injury or disease, and promoting their health. Medicine encompasses a variety of health care practices evolved to maintain and restore health by the prevention and treatment of illness. Contemporary medicine applies biomedical sciences, biomedical research, genetics, and medical technology to diagnose, treat, and prevent injury and disease, typically through pharmaceuticals or surgery, but also through therapies as diverse as psychotherapy, external splints and traction, medical devices, biologics, and ionizing radiation, amongst others.

The term medical staff in the context of a hospital refers to an organized body of licensed physicians (MD and DO), dentists (DDS and DDM), and other healthcare providers (including podiatrists and psychologists) who are authorized by state law and by a hospital through its medical staff Bylaws to provide medical care. The healthcare team, regardless of whether you're treated at a large academic institution or a small, rural private practice, is the group of professionals who contribute to your care and treatment as a patient. Typical members of a healthcare team are a doctor and a registered nurse.

Medical higher education institutions and the public starting from the 2023-2024 academic year a student of health technical schools, well versed in foreign languages students were encouraged. According to the relevant order of the Minister of Health dated August 11, 2023, students of higher education institutions of medicine and technical schools of public health, with an internationally recognized level of English language proficiency of at least 7.5 certificate (IELTS Academic) and knowledge of German and French to students with an internationally recognized certificate of designation C1 on 1 January 2023 starting from September, the base calculation during the validity period of their certificate monthly ministerial stipend in the amount of three times the amount (990 thousand soums) payment procedure will be introduced.

This scholarship is PQ-4666 of the President of April 7, 2020 to the students of higher medical education institutions provided for in paragraph 4 of the decision is given in addition to the payment. Rectors of medical higher education institutions and by the directors of health technical schools the public for this scholarship is awarded quarterly additional information about candidates applying for admission and it is determined that it will be submitted to the Department of Science and Education of the Ministry. In addition, employees of secondary and higher educational institutions an additional bonus will be added to his salary it has been if he has one of the certificates.

Due to the high level of attention paid to medicine in our country, healthy and medical staff with mature competence in bringing up a mature generation plays an important role. The medical facility established by the initiative of the President the number of institutions is increasing day by day. Developed countries relations with are strengthening. Including "Samarkand improving the qualifications of employees of the state medical university and their specialization" centre mutual cooperation agreements with developed countries are also being built. For example: Afghanistan, Germany, Tajikistan, Korea, India, Russia, Kyrgyzstan.

The main purpose of learning a foreign language in medical schools is the practical use of the foreign language as a professional communication, information activities and further self-education. In the field of medicine, English is the most useful language for medical professionals. This is the language of international communication and is widely used in scientific research and medical literature. Knowledge of the English language allows access to the latest information and international facilitates participation in conferences and exchanges. English is the best foreign language for medicine to learn since it's one of the most widely spoken. It's considered the language of business and industry, and is often considered a second language of many countries.

In conclusion, it can be said that foreign languages play an important role in medical practice. Knowledge of foreign languages helps medical workers, especially if they do not know the national language allows effective communication with patients. These symptoms, diagnosis and leading to a clearer understanding of the treatment plan. In addition, knowledge of foreign languages in international medicine, medical research, with immigrants and refugees useful in work. English is especially important for healthcare professionals is an important language, but Spanish, French, Chinese, Russian and other languages are also important may be useful depending on needs and work context. On the whole, Knowledge of foreign languages improves medical practice and provides quality medical care to patients helps to provide assistance.
